## Vigilancia de la Salud Pública

Mes AGOSTO 2017 - Edición II-UESA

### EDITORIAL

#### **FORTALECIMIENTO DE LA VIGILANCIA EPIDEMIOLÓGICA DE LA INFECCIÓN POR VIH**

La vigilancia en salud pública de la infección por VIH en el país, a través de sus diferentes componentes como son la notificación de casos, la vigilancia integrada serológica y del comportamiento en grupos poblacionales clave, el modelamiento matemático y estudios complementarios, proporciona información estratégica para la toma de decisiones.

Cambios importantes en la dinámica de la epidemia de VIH en el país en los últimos años, hicieron necesario realizar algunos cambios y actualizaciones en el sistema de vigilancia, los cuales fueron incluidos en la Norma Técnica de Salud para la Vigilancia de la Infección por VIH e ITS (NTS N° 115-MINSA/ DGE V.01.), la misma que está en proceso de implementación.

En lo referente a la notificación de casos, dicho documento normativo establece el uso de la ficha de notificación de caso de infección por VIH actualizada, así como el uso de un aplicativo informático en web que facilite los procesos de vigilancia según las disposiciones establecidas en la norma técnica. En ese sentido, el presente año culminó el desarrollo y validación del aplicativo NOTI VIH-ITS, y se ha iniciado su implementación en el sector salud, para lo cual se vienen desarrollando reuniones técnicas y asistencia técnica al personal responsable de la vigilancia en las instituciones que conforman el sector salud.

Se tiene por objetivo fortalecer la vigilancia de la infección por el VIH en el país, con especial énfasis en la vigilancia de la transmisión materno infantil del VIH, con una progresiva reducción del subregistro de casos de infección por VIH y eventos sujetos a vigilancia, y la articulación de los sistemas de información existentes, para disponer de información estratégica oportuna para la medición de la respuesta del sector salud al VIH y para la toma de decisiones. A su vez se tiene programada la implementación de estudios de vigilancia integrada a nivel subnacional en poblaciones clave, para lo cual será deberán destinar los recursos necesarios que garanticen su ejecución. Con miras a lograr el objetivo planteado, se han realizado avances importantes en la implementación del documento normativo marco, sin embargo se seguirá trabajando en algunos aspectos importantes que contribuyan al logro de dicho objetivo.

# TENDENCIA DE CASOS DE DAÑOS SUJETOS A VIGILANCIA EPIDEMIOLÓGICA

## TENDENCIA Y TASA DE VARIACION DE ENFERMEDADES VIGILADAS RED HUAURA OYON A LA SEMANA N° 34 - 2017
